

UNDERSTANDING THE COEXTRUSION PROCESS

Coextrusion Technology for RELIABILT 350 Windows & Patio Doors

Built for durability. Designed for modern style.

The RELIABILT West 350 Series uses advanced coextrusion technology to deliver long-lasting performance, bold color options, and low-maintenance ease, ideal for today's homeowner.

What Is Coextrusion?

Coextrusion fuses multiple vinyl layers into one strong, seamless profile. This integrated capstock provides enhanced UV protection, scratch resistance, and deep, rich exterior colors that won't peel or fade over time.

Key Advantages for Homeowners and Contractors

Strength That Lasts

Tough coextruded exteriors resist weathering and harsh climate conditions, leaving a beautiful finish for years to come.

Classic Dark Colors are Back in Style

Black and bronze finishes stay vibrant thanks to heat-reflective pigments and built-in UV inhibitors.

Low Maintenance

Because color is part of the material, not painted or laminated, the finish stays smooth and worry-free with minimal upkeep.

RELIABILT Series 350 combines advanced technology with reliable everyday performance, giving contractors a smarter, stronger solution for today's homes.
