VINYL COLOR OPTIONS* (interior & exterior)

WINDOW HARDWARE FINISHES*

CO-EXTRUDED COLOR OPTIONS** (exterior)

RELIABILT'S dark exterior colors are engineered specifically to satisfy the design and performance requirements of the western region. Through the co-extrusion process, both the interior and exterior colors are fused into the window profile. This produces a long-lasting, high-performance color that is an integral part of the window, and not just a coating on the exterior surface.

GRID TYPE OPTIONS

Note: 2\" SDL also available

Many RELIABILT products can be configured to meet ENERGY STAR® ratings in most climate zones. Verify product specifics before ordering.

* Printing process may affect color shown. Please refer to actual window sample when selecting colors.
 ** Laminated black interior with co-extruded black exterior on windows. Geographically limited availability.
