# Choosing The Right Windows & Patio Doors

Home / Choosing The Right Window or Patio Door

## Windows & Doors Designed for Performance

ReliaBilt windows offer long-lasting strength and energy efficiency. Take a closer look at some of the key features that make our windows weather resistant, durable and make your home comfortable.

### KEY FEATURES

#### Features you should look at and consider.

Part of choosing the right windows for your home is knowing what features to look at as part of your product selection considerations.

1. Rigid Vinyl Construction
2. All-Welded Frame and Sash
3. Secure Locking Systems
4. Insulated Glass with Warm-Edge Spacer
5. Gas Fill Between Glass Panes
6. Performance Glass System Options
7. Integrated Lift Rail
8. Sloped Sill
9. Thermal Insulation in Frame Chambers

### ENERGY SAVING OPTIONS

#### Smart energy saving options to consider.

ReliaBilt provides you with state-of-the-art, energy efficient windows and doors that will start to pay for themselves.

##### Low-E Glass Technology

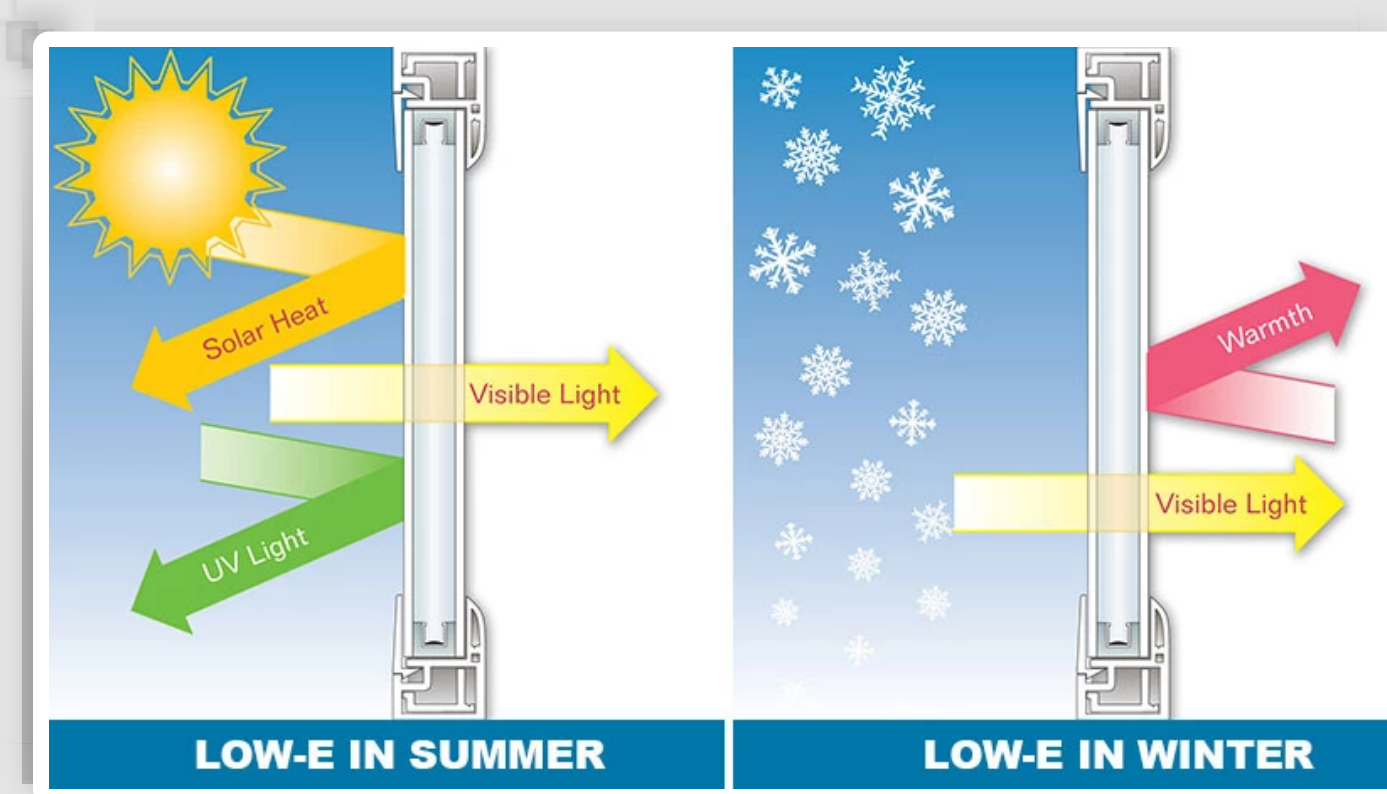

During the winter, this high-tech glass lets natural light and warmth in. During the summer, it reflects heat. This gives you better insulation, less condensation and greater energy savings all year.

##### Low-E Glass with Insulating Argon Gas

Argon gas forms an invisible blanket between window glass panes and creates a buffer against outside noise.

##### Ultra Low-E glass with Argon Gas

Choose this option for optimal energy efficiency and maximum cost savings. Ultra Low-E glass offers three invisible layers of silver coating in addition to the superior thermal performance of argon gas.

### WINDOW & DOOR STYLES

#### Consider the style of windows and doors you want.

You can design an efficient solution that matches your home's specific design, with our variety of window and patio door style options and configurations:

- Double Hung Windows
- Single Hung Windows
- 2-Lite Slider Windows
- 3-Lite Slider Windows
- Picture & Specialty Shaped Windows
- Awning Windows
- Casement Windows
- Bay and Bow Windows
- Garden Windows
- Sliding Patio Doors
- Sliding Patio Doors with Blinds Between The Glass

### DESIGN & CUSTOMIZATION

#### Choices to customize your windows and patio doors.

ReliaBilt windows are available with a wide selection of design, energy efficiency and performance options:

##### Colors

Follow your home's design and personal style to find the right interior and exterior color for your windows and doors.

- Add curb appeal with a designer exterior color.
- A woodgrain interior laminate adds warmth to any home design.
- Vinyl color is integrated into the profile for long-lasting beauty.

##### Grid Options

Window grids elevate the architectural character and curb appeal of your home. Grids between glass panes never require dusting or cleaning. Simulated Divided Lites are dramatic, raised grids that give the look of traditional window panes.

##### Hardware Options

Durable hardware tightly closes your window and door for increased weatherability and meets forced entry requirements for added peace of mind. From color-coordinated or designer metallic finishes to specialty hardware for increased safety and accessibility, our series has the hardware to meet your needs.

#### Not Sure Where to Get Started?

It's easy to find the right window or doors for your home. Just follow this simple breakdown on how to decide which window is best for your project.
