Available Options for New Construction

- Low-E Glass
- Low-E Glass + Argon Gas
- Ultra Low-E Glass + Argon Gas
- Obscure glass
- Double strength glass
- 5/8" or 3/4" flat grid
- 5/8" or 1" contoured grid
- 1 1/8" Simulated Divided Lite grid (vertical or horizontal only)
- White, Almond, Clay Vinyl Colors
- Nine Exterior Painted Colors

Available Options for Replacement

- Low-E Glass
- Low-E Glass + Argon Gas
- Ultra Low-E Glass + Argon Gas
- Obscure glass
- Double strength glass
- 5/8" or 3/4" flat grid
- 5/8" or 1" contoured grid
- 1 1/8" Simulated Divided Lite grid (Series 3900 and 3500 only; vertical or horizontal only)
- White, Almond Vinyl Colors
- Interior Wood Laminates (Series 3900 only; no grid)
- Exterior Bronze Laminate (Series 3500 only; no grid)
- Nine Exterior Painted Colors (Series 3900 and 3201; no grid)
- InsulKor Foam Filled Frame (Series 3900 only)
- Super Spacer nXt Glass (Series 3900 only)
- Triple Pane Low-E with Argon (Series 3900 only)
- Triple Pane Ultra Low-E with Argon (Series 3900 only)
- Decorative Glass (Series 3900 only)
- Lifetime Glass Breakage Warranty (standard on 3900)

Note: Manufacturer reserves the right to substitute components as necessary for continued product improvement.

Specialty Shape Vinyl Windows

Triangle and Trapezoid

Color options:**

VINYL

Note: Clay only available for New Construction

PAINTED COLORS

Hunter Green, Dark Chocolate, Terratone, Clay, Black

Exterior Paint, Interior

Brick Red, Gray, Tan, Bronze

Note: Available in Series 3900, 3201 and most New Construction

LAMINATED

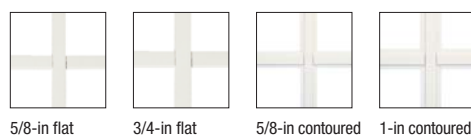

Light Oak, Dark Oak, Cherry, Bronze

Note: Interior Wood Laminates available on Series 3900 only; no grid
Exterior Bronze Laminate available on Series 3500 only; no grid

Eyebrow Transom

Grid options:

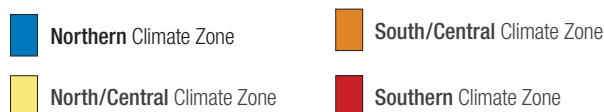

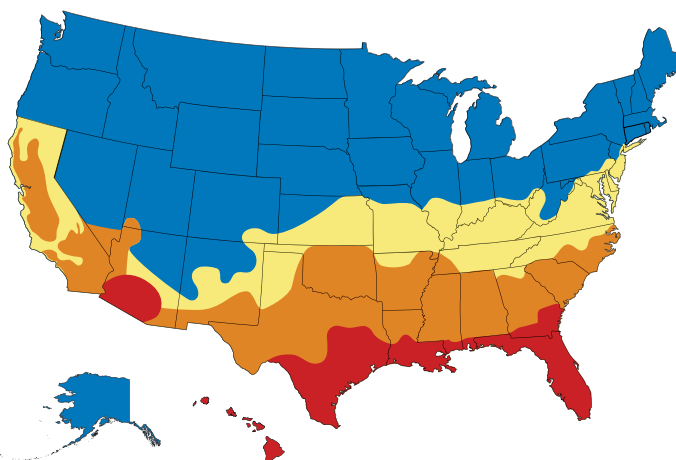

1-1/8-in Simulated Divided Lite (SDL)

Between-the-panes and simulated divided lite (SDL) grid options enhance the cosmetic appeal of any home and make cleaning simple.

Energy Efficient Glass options:

- Low-E Glass:** Low-E glass is coated with a microscopic layer of silver that reflects radiant solar energy while permitting visible light to pass through the glass, providing more comfort and lower energy costs.
- Low-E Glass + Argon Gas:** Argon gas works like an insulating blanket between two panes of glass to further improve thermal efficiency and decrease outside sound levels.
- Ultra Low-E Glass + Argon Gas:** Choose our ultimate glass package for optimal energy efficiency and maximum cost savings. Ultra Low-E glass offers three invisible layers of silver coating in addition to the superior thermal performance of argon gas.

Criteria for Windows:

| Climate Zone | U-Factor | SHGC | |
|---------------------|--------------------------------------|-----------------------------------|---|
| Northern: | ≤ 0.27 = 0.28 = 0.29 = 0.30 | Any ≥ 0.32 ≥ 0.37 ≥ 0.42 | Prescriptive Equivalent Energy Performance |
| North/Central: | ≤ 0.30 | ≤ 0.40 | |
| South/Central: | ≤ 0.30 | ≤ 0.25 | |
| Southern: | ≤ 0.40 | ≤ 0.25 | |
| Air Leakage Rating: | ≤ 0.3 cfm/ft² | | |

ENERGY STAR compliance available in all series. Verify product specifics before ordering.

The ENERGY STAR program for windows divides the country into four distinct climate zones to recognize the varying heating and cooling months among the states. For patio doors, there is only one U-Factor and one Solar Heat Gain Coefficient (SHGC) requirement for ENERGY STAR compliance.

Please consult your home improvement or new construction professional for specific thermal properties that vary based on glass options and grid choices, and verify your window's actual performance to ensure ENERGY STAR rating in your specific climate zone.

Note: Manufacturer reserves the right to substitute components as necessary for continuing product improvement.

* Screens are not meant to restrain a child from falling through an open window.

** Printing process may affect color shown. Please refer to actual window sample when selecting colors.
