Why ReliaBilt?

With high standards built into every vinyl sliding patio door, ReliaBilt delivers a lifetime of **energy-efficient**, **low-maintenance** performance that opens your home to abundant natural light.

Choosing the Right Sliding Patio Door is Easy

STEP 1

Choose your features and styles

What benefits do you want from a new patio door? Energy efficiency? A screen for fresh air? Increased safety? A custom size?

See pages 5-8 to view the key ReliaBilt features to create your perfect patio door.

STEP 2

Select design options

Choose from exterior and interior colors, metallic hardware finishes, blinds between the glass and a variety of grid profiles and patterns.

See the full options assortment on page 4.

STEP 3

Determine and verify the correct door size

Are you replacing a standard size door or do you need a custom-sized door? If there is any doubt about what size to order for the opening(s), please consult a professional contractor.

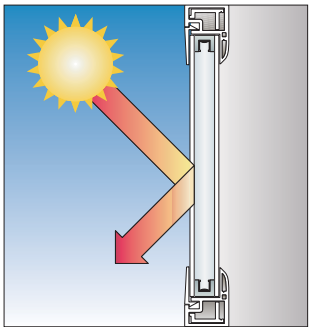

STEP 4

Decide who will install your sliding patio door

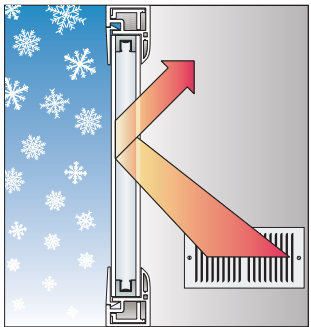

Do it yourself or have a professional install it for you. Please ask an associate for complete details.

Smart Energy Saving Options

Energy efficient windows and doors that will start to pay for themselves.

In the summer, Low-E glass reduces heat gain from the sun to help keep homes cooler.

In the winter, Low-E glass lets the warm solar rays in while blocking the heat in the home from getting out.

Low-E Glass Technology¹

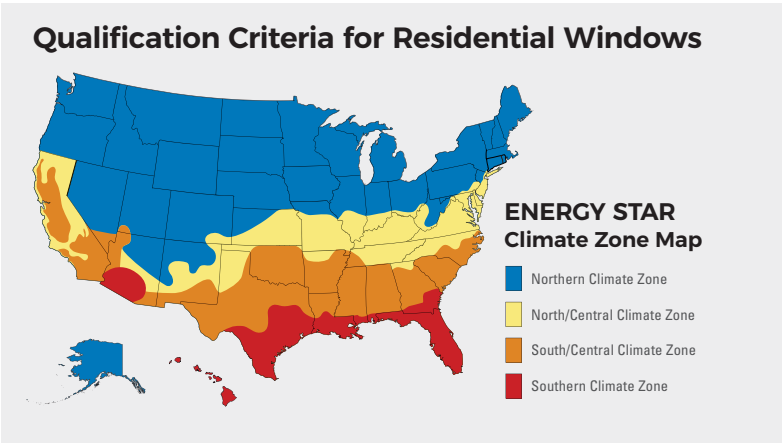

During the winter, this high-tech glass lets natural light and warmth in. During the summer, it reflects heat. This gives you better insulation, less condensation and greater energy savings all year.

Low-E Glass with Insulating Argon Gas

Argon gas forms an invisible blanket between window glass panes and creates a buffer against outside noise.

Ultra Low-E glass with Argon Gas

Choose this option for optimal energy efficiency and maximum cost savings. Ultra Low-E glass offers three invisible layers of silver coating in addition to the superior thermal performance of argon gas.

1 Low emissivity (Low-E) glass reflective properties and solar control performance according to Cardinal Glass and National Fenestration Rating Council (NFRC). Please see www.cardinalcorp.com for additional information on solar control glass.

2 ENERGY STAR certification based on individual window's or door's glass and grid configuration meeting both U-Value and Solar Heat Gain Coefficient as established by each ENERGY STAR climate zone.

ReliaBilt Windows and sliding patio doors can be ordered to meet ENERGY STAR[®] guidelines for any region in the country.²
