Why RELIABILT?

For years RELIABILT has been recognized for value, performance and style. Today's RELIABILT vinyl windows reflect those same qualities and are built to provide decades of energy-efficient, low-maintenance performance.

RELIABILT offers a complete line-up of vinyl windows for any new construction or home improvement need. With easy installation and long lasting performance, RELIABILT windows will enhance your home for years to come.

5 Easy Steps to Choosing the Right Windows

A simple breakdown on how to decide which window type is best for your project.

STEP 1

Do you need Replacement OR New Construction windows?

You need **Replacement** windows for:

- Replacing old, cracked or painted shut windows
- Upgrading to more energy efficient windows
- When installing into an existing window opening

Replacement windows DO NOT have an installation/nailing fin.

You need **New Construction** windows for:

- Remodeling or room additions
- New construction or home building
- When the existing frame is completely removed

The primary distinction of the windows of **New Construction** is the presence of an installation/nailing fin

STEP 2

Choose your features and styles

What is important to you about new windows? Is it energy efficiency? Upgraded strength and insulation? Performance glass? And which operating styles fits best with your home?

See pages 4-18 to view the key RELIABILT features and styles to create the your perfect window

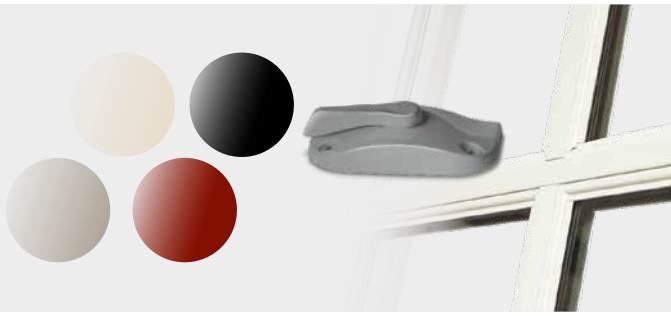

STEP 3

Choose your window options

RELIABILT windows are available with a wide selection of design options, energy-efficient solutions and functional styles. Choose from glass enhancements, style upgrades and grid choices.

See the full options assortment on pages 7-8.

STEP 4

Determine and verify the correct window size

If there is any doubt about what size to order for the opening(s), please consult a professional contractor.

STEP 5

Decide who will install your windows

Do it yourself or have a professional install for you. Please ask an associate for complete details.

GET IT INSTALLED

RELIABILT®

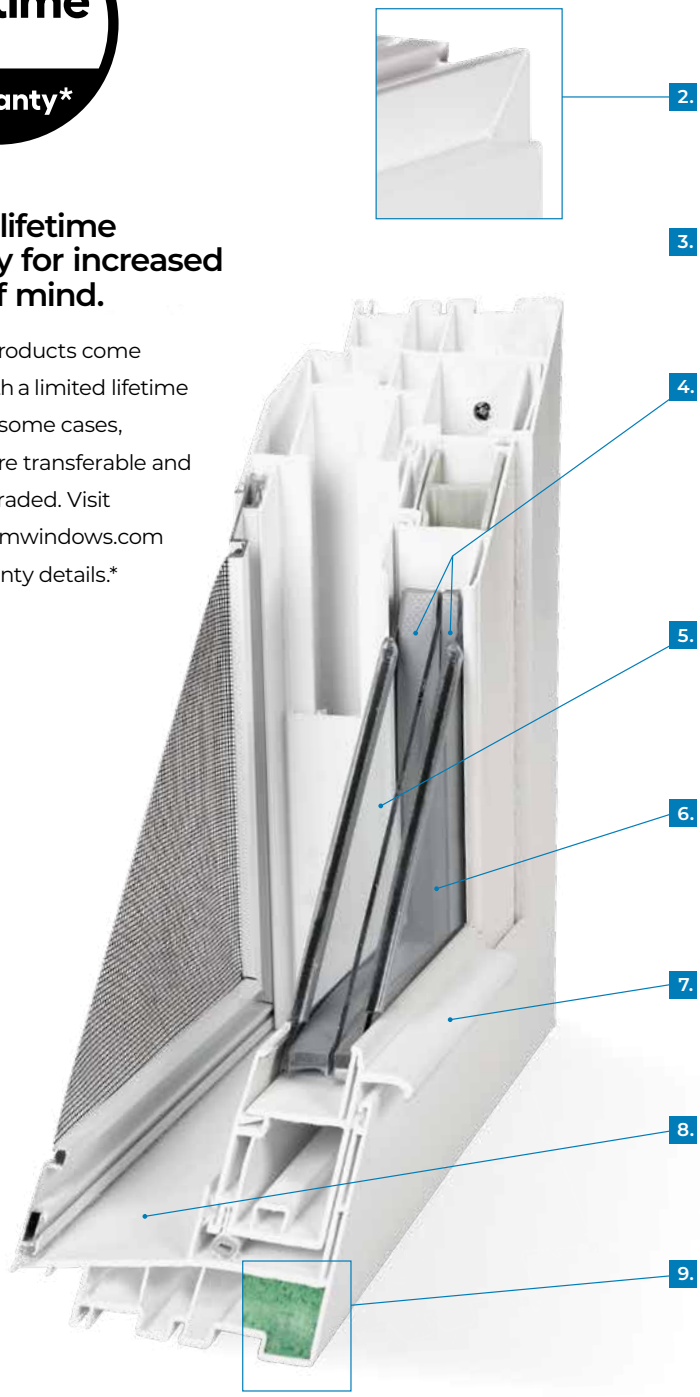

Designed for Performance

RELIABILT windows offer long-lasting strength and energy efficiency. Take a closer look at some of the key features that make our windows weather resistant, durable and make your home comfortable.

Limited Lifetime Warranty*

Limited lifetime warranty for increased peace of mind.

RELIABILT products come standard with a limited lifetime warranty. In some cases, warranties are transferable and may be upgraded. Visit reliabilt.atriumwindows.com for full warranty details.*

KEY FEATURES:

1. Vinyl Construction

Virgin vinyl requires less maintenance over time, since it does not peel or chip like painted wood windows.

2. All-Welded Frame and Sash

Fusion-welded sashes and frame add strength and boost insulation.

3. Locking Systems

Low profile, positive-action cam locks or sweep locks increase security.

4. Insulated Glass with Warm-Edge Spacer

Insulated glass provides outstanding thermal efficiency and spacers separate and secure the glass panes to optimize the performance and structure of the glass (Series 3900 triple pane glass option with Warm-Edge Spacer shown here).

5. Gas Fill (optional)

Non-toxic gases inserted between the glass panes, instead of air, help further insulate the window and increase efficiency

6. Performance Glass Options

We offer a wide selection of glass options for your region, that decrease the amount of temperature transfer from outside your home.

7. Integrated Lift Rail

Slim-line lift rail allows you to easily lift and lower the sash.

8. Sloped Sill

Full vinyl sash dam on sill and high performance weather stripping protect against air infiltration.

9. Thermal Insulation

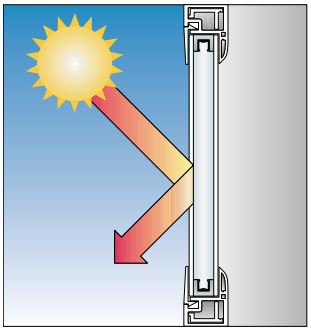

Optional multi-cavity, insulating material fills cavities within the frame to improve the efficiency of your windows (only available in select series).

* Please visit reliabilt.atriumwindows.com for complete warranty information and coverage exclusions.

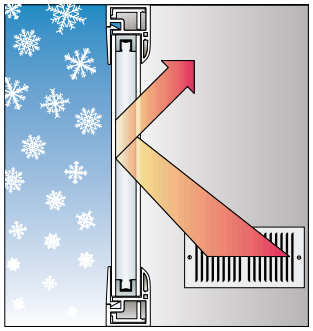

Note: Manufacturer reserves the right to substitute components as necessary for continuing product improvement

Smart Energy Saving Options

Energy efficient windows and doors that will start to pay for themselves.

In the summer, Low-E glass reduces heat gain from the sun to help keep homes cooler.

In the winter, Low-E glass lets the warm solar rays in while blocking the heat in the home from getting out.

Low-E Glass Technology[1]

During the winter, this high-tech glass lets natural light and warmth in. During the summer, it reflects heat. This gives you better insulation, less condensation and greater energy savings all year.

Low-E Glass with Insulating Argon Gas

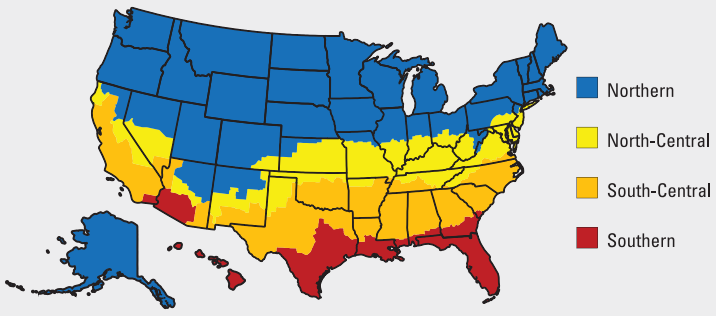

Argon gas forms an invisible blanket between window glass panes and creates a buffer against outside noise.

Ultra Low-E glass with Argon Gas

Choose this option for optimal energy efficiency and maximum cost savings. Ultra Low-E glass offers three invisible layers of silver coating in addition to the superior thermal performance of argon gas.

Qualification Criteria for Residential Windows

ENERGY STAR Climate Zone Map

ENERGY STAR Version 7.0 – Effective Date 10/23/2023

1 Low emissivity (Low-E) glass reflective properties and solar control performance according to Cardinal Glass and National Fenestration Rating Council (NFRC). Please see www.cardinalcorp.com for additional information on solar control glass.

2 ENERGY STAR certification based on individual window's or door's glass and grid configuration meeting both U-Value and Solar Heat Gain Coefficient as established by each ENERGY STAR climate zone.

** Printing process may affect color shown. Please refer to actual window sample when selecting colors.

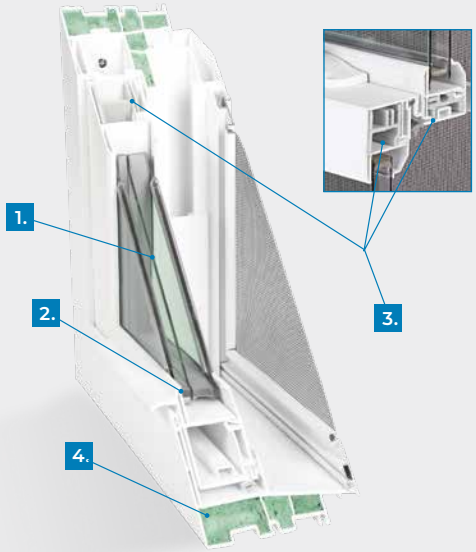

Series 3900 INSULKOR™ TECHNOLOGY:

Only available on the Series 3900

InsulKor™ technology is a system of sash and frame enhancements that dramatically improves the performance of the Series 3900 double hung window. Our exclusive InsulKor fiberglass-enriched polyurethane sash reinforcement yields better energy efficiency while maintaining the structural integrity of traditional metal reinforcement.

The optional InsulKor foam injections add thermal-enhancing insulation in specific hollows of the frame.

This window is one of the most energy efficient when combined with either of our R-5 rated, triple-pane glazing systems, these InsulKor enhancements help make the Series 3900 one of the most energy efficient, strongest window systems available today.

1. R-5 compliant with triple pane glass
2. Super Spacer® sealant system available for triple pane glass systems on Series 3900 windows
3. InsulKor fiberglass-enriched polyurethane sash reinforcement (available in Series 3900 only)
4. Optional InsulKor multi-cavity foam-filled frame injections (available in Series 3900 and 3201)

RELIABLE PERFORMANCE,

BUILT TO LAST.

Our Warranty

RELIABILT windows and doors come with increased peace of mind.

Each RELIABILT Replacement window comes with a standard Limited Lifetime Warranty on the vinyl and all working parts, including screens.*

For RELIABILT New Construction Windows and all Patio Doors, we offer a Limited Lifetime Warranty covering any vinyl factory defects.**

Each RELIABILT product is labeled with a specific product identification number prominently displayed on a special sticker for your convenience. Refer to this ID number if ever you call to order new parts.

DO NOT REMOVE
MAKE DATE: 6/2/2026 WARRANTY: 02589514
SALES ORDER: 00735962

* Prorating may apply and labor is not covered. Screens are not meant to restrain a child from falling through an open window.

** Visit the product detail page on **Lowes.com** for full warranty information.

1 Other window series locks are color matched to your vinyl color of choice.

2 Insulated glass is prorated depending on series and accidental glass breakage coverage is available. The warranty is also transferable one time only by the original single family.

RELIABILT®

Series 3900

Our premier window, the 3900 features a number of deluxe enhancements made standard, a lifetime glass breakage warranty and our exclusive InsulKor™ sash technology for top-of-the-line energy efficiency and ultimate style.

White Series 3900 double hung windows with colonial contoured grid

- Exclusive InsulKor™ polyurethane fiberglass enriched sash reinforcement, for superior thermal and structural performance
- Sashes tilt in for easy cleaning from inside your home
- Dual low profile locks increase security (2 locks standard at 27-1/4-in width or wider)
- Dual push-button night latches position sashes for optimal ventilation and safety
- Smooth sash operation with 3/4-in constant force coil balances
- Integrated slim line lift rail makes opening and closing the window easy
- On sliding windows, tandem rollers ride easily along friction free glide channel
- Standard with half screen on double hung and full screen on slider. Screens are removable from the inside*
- Double Hung Design Pressure (DP) rating of 60 (window size tested 36-in x 74-in)
- Slider Design Pressure (DP) rating of 50 (window size tested 72-in x 48-in)
- 3-1/4-in jamb depth, ideal for most homes
- 4-1/4-in frame thickness enhances appearance as well as provides structural integrity

* Screens are not meant to restrain a child from falling through an open window.

RELIABILT®

Series 3201

The Series 3201 is the industry's best value window. Both sashes operate and tilt in for easy cleaning from inside the home, and its insulated glass panels provide energy efficient performance in any climate.

▲ Black exterior laminate Series 3201 double hung windows

- Reinforced multi-cavity construction offers additional thermal protection and structural integrity
- Optional InsulKor™ foam filled frame
- 2 locks offer increased security (2 locks standard at 27-1/4-in width or wider)
- Push-button night vents position sashes for optimum ventilation
- Protection against weather infiltration by interlocking sash design
- Constant force coil balance system for easy sash movement
- Integrated lift rails allow sashes to open and close conveniently
- Sloped sill makes water run away from the house
- Series 3201 2-lite sliding windows have one fixed panel and one operating panel
- On sliding windows, tandem rollers ride easily along friction free glide channel
- Half screen is standard, and screens are removable from the inside*
- Optional integrated nail fin
- Blocks air infiltration with dual-fin weather stripping and rubber bulb seal
- Ventilates nicely through extruded half screen*
- Double Hung Design Pressure (DP) 35 (window size tested 36-in x 74-in)
- Slider Design Pressure (DP) 40 rating (window test size 72-in x 48-in)
- Jamb depth: 3-1/4-in

* Screens are not meant to restrain a child from falling through an open window.

RELIABILT®

Series 3100

Positioned for value, the 3100 is the perfect choice when budget matters most. The cost-effective single hung features a bottom tilting sash for accessible cleaning.

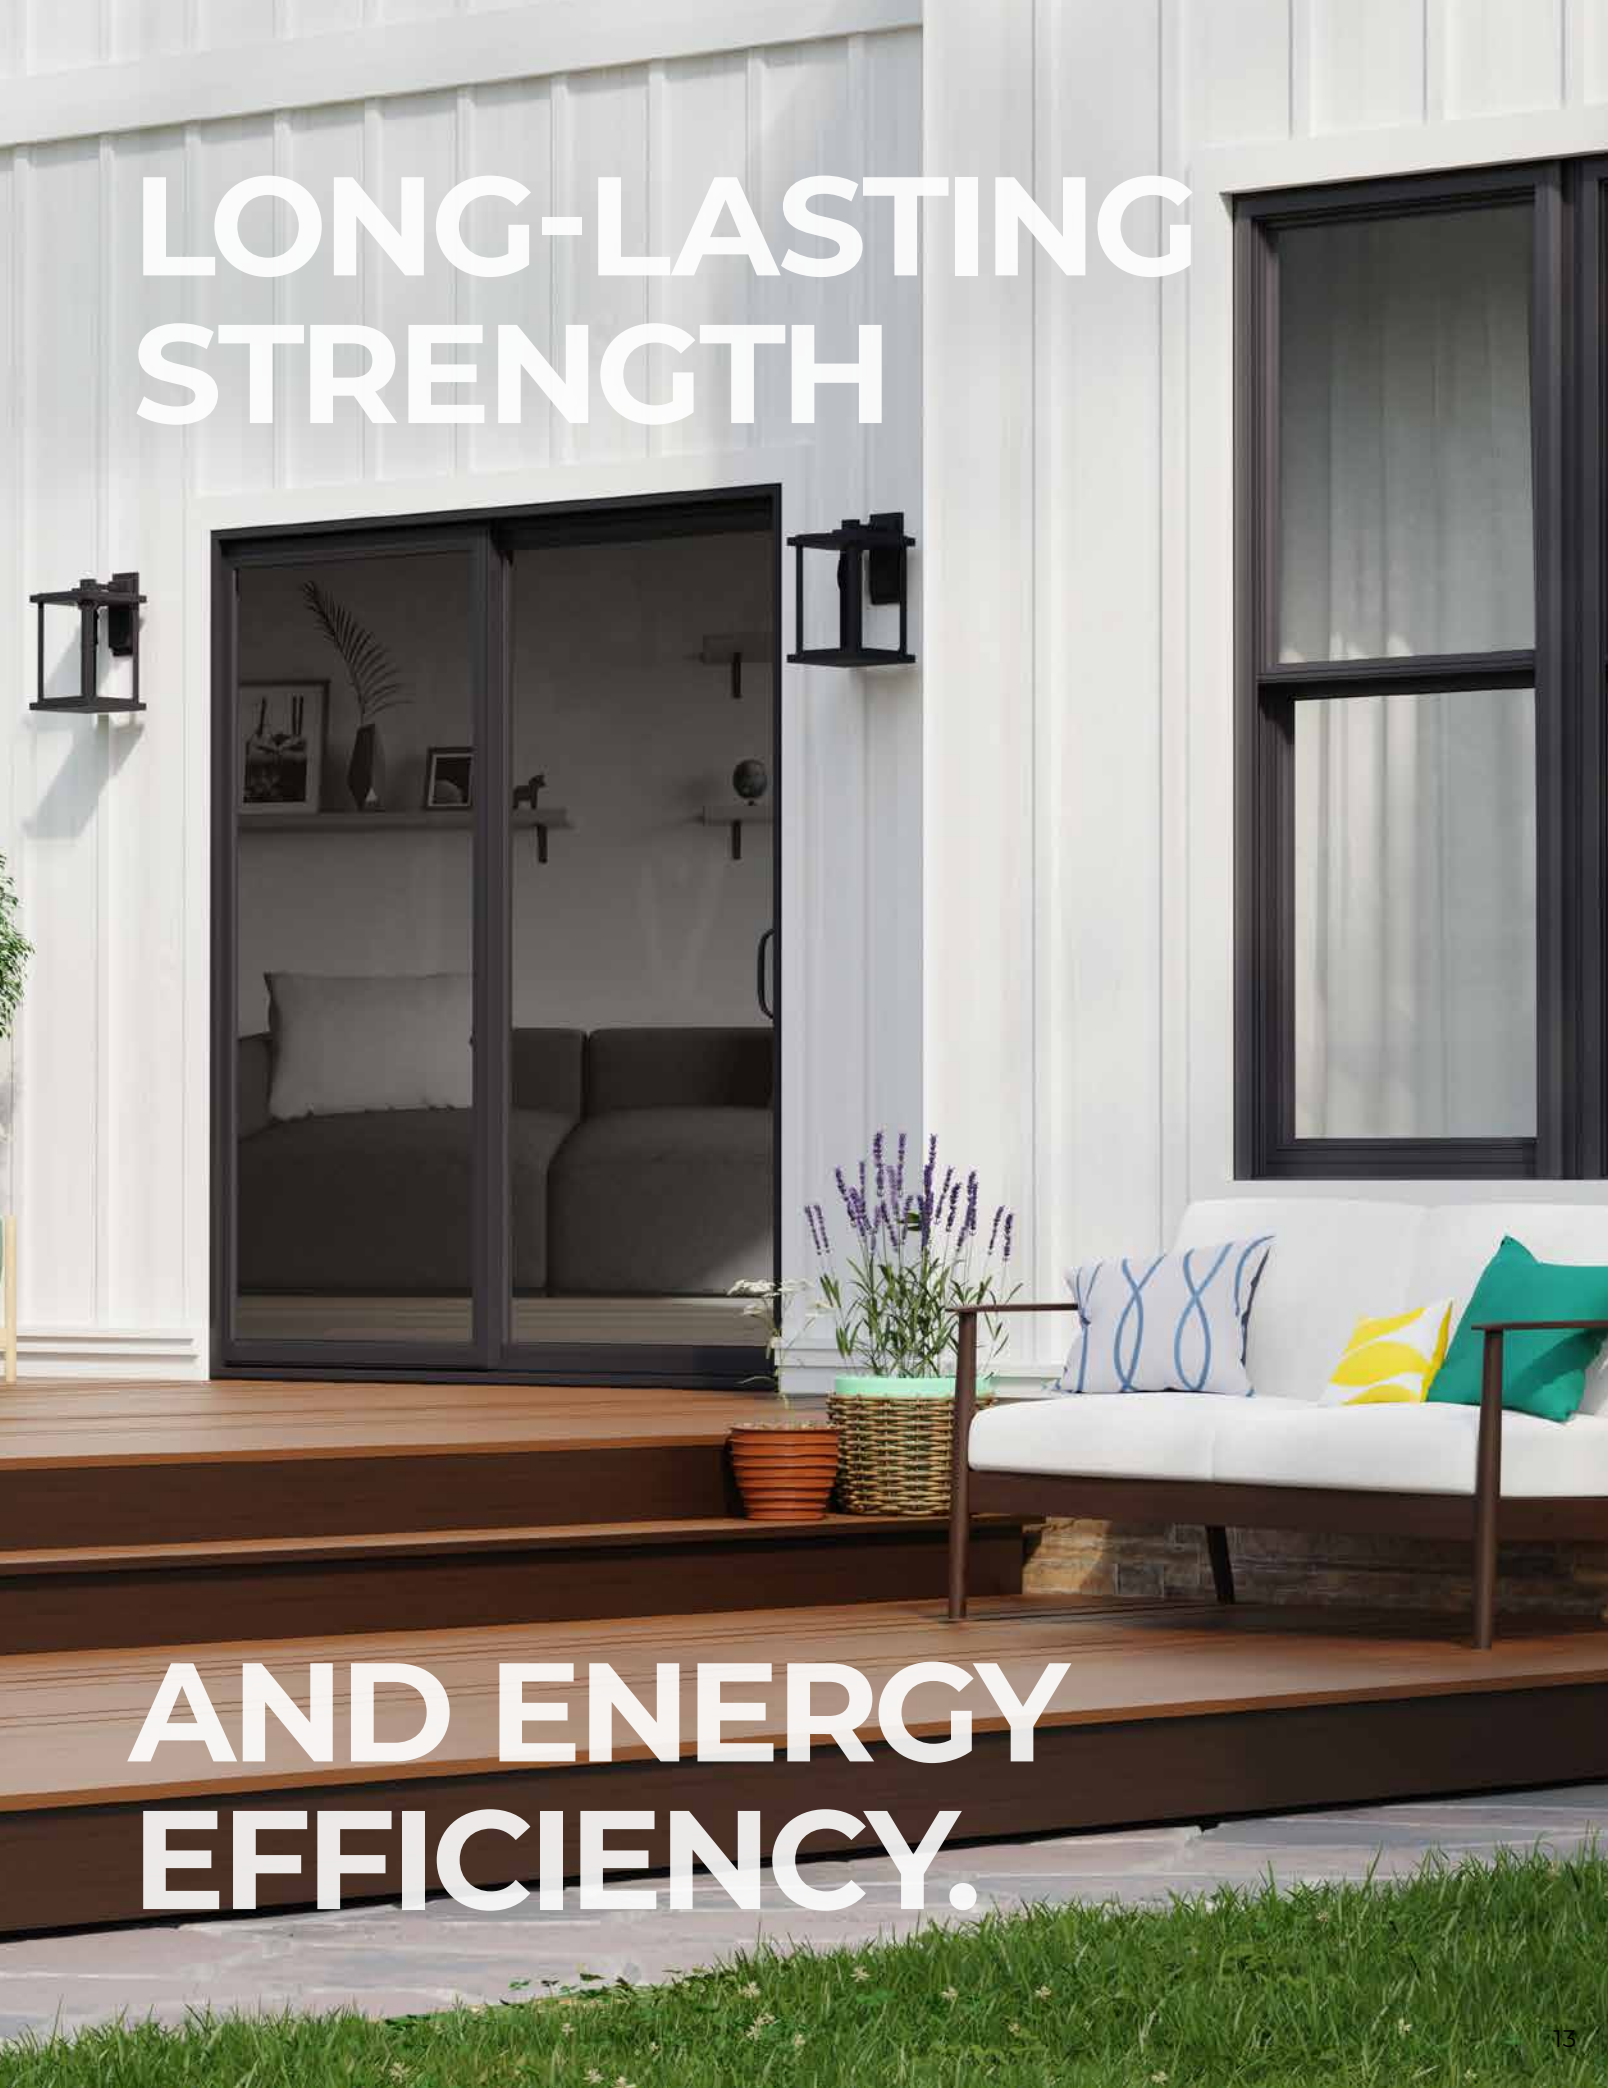

White Series 3100 windows with colonial contoured grid

- 2 locks offer increased security (2 locks standard at 27-1/4-in width or wider)
- Block & tackle balance system allows for smooth operation
- Sash lifts easily with a full-length lift rail
- On sliding windows, tandem rollers ride easily along friction free glide channel
- Standard with half screen. Screens are removable from the inside.*
- Water runs away from house due to sloped sill design
- Outside air ventilates through half screen on single hung*
- Single Hung Design Pressure (DP) 50 rating (window size tested 36-in x 74-in)
- Jamb depth: 2-5/8-in

* Screens are not meant to restrain a child from falling through an open window.
